SUMMARY

Product designer with a systems mindset and a track record of improving complex, real-world products. I specialize in turning dense information, constraints, and ambiguous requirements into clear, usable experiences. My work spans UX research, interaction design, and visual systems, with a focus on outcomes. My recent work created better comprehension, stronger engagement, and a product that scales.

CORE SKILLS

UX Research • User Research • Prototyping • Interaction & Information Architecture • Visual & UI Design • Design Systems • Figma • Cross-functional Collaboration • Design Leadership

EXPERIENCE

Product Designer, ACRO Automation Systems *Milwaukee, WI | Sept 2025 – Present*

- Led the full website redesign, improving user experience and increasing inbound inquiries by 1.4x while boosting dwell time by 28%.
- Established ACRO's core UI component system in Figma, including typography hierarchy (H1–H3, body), button states, and reusable component shapes, creating a consistent foundation for the website and future product work.
- Leading the information architecture for an 80-person, company-wide SharePoint migration, interviewing the employees who actually use SharePoint day to day to define a two-tier structure that replaces 10+ disorganized network drives and removes ambiguity around where files live.

Graphic Designer, ACRO Automation Systems *Milwaukee, WI | July 2022 – Sept 2025*

- Oversaw social media, video, and photo campaigns that shaped how customers experienced the brand.
- Collaborated across teams to align visual design, content, and business goals for a cohesive brand presence.
- Built and launched the company's first brand book, creating unified design standards across digital and print.

Contract Designer, StoryLinq *Oct 2021 – Feb 2022*

- Partnered with founders to evolve early-stage wireframes into a production-ready UI, helping define the product's visual language and interaction patterns.
- Created a scalable icon and graphic system to support usability and consistency.

Design & Media Intern, ACRO Automation Systems *Milwaukee, WI | May 2021 – Sept 2021*

- Contributed to design and media initiatives while learning to align design decisions with engineering constraints in a B2B manufacturing environment.

EDUCATION

University of Wisconsin-Milwaukee, BFA, Digital Communication and Design, 2022

Codecademy, HTML & CSS, 2023
